RN Service Line Nurse Manager – Transplantation

The Department of Transplantation and Hepatobiliary Diseases at Lahey Hospital and Medical Center, is seeking a talented Service Line Nurse Manager (SLNM) to play a key role managing the day to day operations of this dynamic department. The Department of Transplantation and Hepatobiliary Diseases is part of an integrated, multidisciplinary group practice providing comprehensive care for liver and kidney transplant patients. Currently it is the largest living liver donor program in the country.

The Department of Transplantation and Hepatobiliary Diseases is a truly integrated department with 5 surgeons, and five medical physicians including 3 Transplant Hepatologists and 2 Transplant Nephrologists. The department also includes 2 PA, 8 RNs functioning in high-level Transplant Coordinator roles, 1 LPN and 2 Medical Assistants.

The SLNM is responsible for nursing policy development and implementation, recruitment and management of staff including disciplinary action as needed, regulatory compliance, educational development of nursing staff and scheduling of staff to insure adequate coverage daily. The SLNM will collaborate closely with other members of the transplant team including Social Work, Pharmacy, Dietary, Infectious Disease and Behavioral Medicine to plan and coordinate delivery of patient care.

The SLNM participates in a shared governance model providing leadership for unit based councils and other nursing committees. Qualifications Education: Graduate of a state approved or accredited School of Nursing. BSN Required
