Transplant Nutrition Conference

Communicate. Collaborate. Achieve the Magic of Transplant...

July 27-28, 2016
Hyatt Regency Grand Cypress
Orlando, Florida
The goal of the Transplant Nutrition Workshop is to provide state-of-the-art information on the science and practice of transplant nutrition to solid organ transplant dietitians and other transplant professionals. The workshop offers continuing education lectures on current adult and pediatric topics as well as a practice poster session and opportunities for networking and informal practice discussions. This workshop is appropriate for both the entry level and the advanced practice transplant dietitian and provides content to maintain required competency in transplant nutrition.

At the conclusion of the 2-day Transplant Nutrition Workshop, the attendees will be able to:

- evaluate and recommend appropriate nutrition treatment for the solid transplant patient while considering nutritional and functional status, metabolic derangement, and bone status.
- analyze the most recent Critical Care Guidelines and apply them to management of enteral and parenteral nutrition in critically ill adult transplant recipients.
- improve working knowledge of CMS guidelines related to transplant nutrition and how this can impact continuity of care.
- understand how the development of medical nutrition therapy competencies for transplant dietitians can standardize overall practices and improve patient care.

NATCO will apply for approximately 13.50 nursing contact hours for the Transplant Nutrition Conference.

Please visit www.natco1.org for more details on continuing education credits, learning objectives, a full faculty listing, special events and travel.
